Stryker-ASI Shoulder Arthroscopy Course

Advanced techniques within
shoulder arthroscopy

Agenda 17th-19th March, 2019
Annecy France

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery. The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Stryker-ASI **Shoulder Arthroscopy Course**

Dear friends,

My team and I are delighted to welcome you to this course organised by the Alps Surgery Institute and Stryker.

Shoulder surgery is a very entertaining discipline requiring skill, creativity and rigour. There are always new things to discover and improvements to be made. We here in Annecy are motivated by a passion for achieving these goals, a passion that I know is nothing if not shared!!

So thank you to a great international faculty, thank you to my team, and thank you to Stryker, for sharing their passion for shoulders & their expertise with us here.

We hope that we can pass on some of both of these to you over the next few days.

We will do our best to make these days enjoyable and beneficial for your practice.

Dr Laurent Lafosse
