

EMEA Advanced Arthroscopy & Arthroplasty Shoulder Academy

November 23-25, 2023
Annecy, France

Welcome to the Johnson & Johnson Institute

Welcome to Anancy and to the Advanced Arthroscopy & Arthroplasty Shoulder Academy!

This Shoulder Academy is intended to enhance participant learning in shoulder arthroscopy and arthroplasty. Focus is on delegate interaction facilitated by in depth case discussion led by experienced faculty. These discussions will address the clinical problems and subsequent treatments of both soft tissue injury and shoulder joint deterioration. Live Surgery observation will then offer insights into real life scenarios and how experts deal with these surgical challenges.

We wish you an instructive course.
